Introduction

The attached Generics Plus Drug List shows many commonly prescribed and clinically useful generic drugs and selected brand drugs to provide coverage for a broad range of diseases. Brand drugs are included when a generic is not available to treat a specific medical condition or the brand drug offers a significant advantage over available generics.

Facts About Generic Drugs

Generic drugs deliver effectiveness, safety, quality and savings. In fact, the Food and Drug Administration (FDA) requires all drugs – brand and generic – to pass through a rigorous multi-step review process. When the FDA approves a generic drug it means the generic drug is the same as the brand drug in:

- Dosage recommendations
- Performance
- Quality
- Safety
- Strength
- Usage
