

Primary Care

Whatever concerns you may have about your health or wellbeing, your primary care provider will take the lead. Your VitellaCare, managed by Crossover clinical providers work together—which means we can easily collaborate as a team. We offer a full range of primary care services, from preventive care and screenings, to sick visits, community resources, and the treatment of minor injuries.

Primary care doesn't have to be only in an exam room or just online—because at VitellaCare, we do both. Our providers are trained to use our secure member technology to send messages back and forth with you, and they can pull any other team member into that conversation. For the times you need or prefer to be in person for care, those appointments can be scheduled, too. Whatever works best for you is what we'll do.

VitellaCare providers bring a diverse breadth of experience to our integrative care teams. We are dedicated to providing quality care to our members while developing an impactful relationship with them—for chronic and acute conditions alike. Your primary care provider will work to determine the root cause of chronic illness and strive for disease prevention, tuning into how a patient's lifestyle and environment can impact their wellbeing. They will also coordinate with other VitellaCare providers to collaborate on your mental health and provide any necessary referrals to high-quality specialty care in your community.

Our comprehensive services include:

- ✓ Comprehensive primary care
- ✓ Wellness check-ups
- ✓ Preventive and sick care
- ✓ Chronic condition management
