

ND NGF HSA Preventive Drug List

Effective January 1, 2026

Your Employer has elected to include a Preventive Drug coverage feature with your prescription benefit plan. The drugs listed below are grouped into broad categories. Each category includes an alphabetical list of drugs. Generic drugs are available for many of the brands noted on this list. Please verify with your plan if a generic drug must be tried before filling a brand version of a drug. Please refer to your benefit materials for coverage details and the plan website for current information as this publication is subject to change. Brands with generic equivalents are not eligible for coverage at the preventive level.

If your employer offers a qualified high deductible health plan (HDHP) intended for use with a health savings account (HSA), the preventive drug list is provided in accordance with U.S. Department of the Treasury and Internal Revenue Service (IRS) guidance for HDHPs and HSAs. The actual cost of the medication will be applied toward the preventive benefit

offered by your employer, allowing you to receive coverage even if you have not yet met your deductible. The Preventive Prescription List is a subset of the Formulary List and HSA preventive benefits are not designed to override the parameters of the benefit plan.

This list will be reviewed periodically and is subject to change. This list includes only formulary prescription products found on the formulary drug list.

Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Reference brands may not themselves be covered, please check your benefit. Some generic products have no reference brand. Brand prescription drugs are shown in all capital letters followed by the generic name. Generic medicines are available for many of the brand-name drugs listed though may not be available in all strengths.
