## Introduction

### Formulary

The goal of the Blue Cross Blue Shield of North Dakota (BCBSND) formulary is to provide our members broad access to drugs and supplies at a reasonable overall cost. The BCBSND Drug Formulary is the list of products (drugs and supplies) that reflect the current recommendations of the BCBSND Pharmacy & Therapeutics (P&T) Committee. The formulary is intended for use in the ambulatory setting. Drugs are selected for addition to the formulary after considering safety, efficacy, uniqueness, and market considerations. **Providers are encouraged to prescribe formulary drugs.**

Benefits are not limited to the drugs on this formulary list. Products not listed in this formulary are non-formulary (NF). The P&T committee may choose to not add a drug or remove a drug from formulary for reasons including safety or efficacy concerns, or because a clinically similar, more cost-effective drug is already on formulary. Newly marketed prescription drugs will not have benefit coverage until the P&T Committee has had an opportunity to review the drug to determine whether the drug will be covered based on safety, efficacy, and the availability of other products within that class of drugs. This formulary list is subject to change. **Drug coverage is dependent on individual plan benefits.**

### Members

To save the most money on prescription drugs, take this Formulary with you each time you visit your physician. Consider asking your physician to prescribe drugs listed in this Formulary, if appropriate. Any and all decisions that require or pertain to independent professional medical judgment or training, or the need for, and dosage of, a prescription drug, must be made solely by you and your physician in accordance with the patient/physician relationship.

The current version and recent changes to this Formulary is available at the BCBSND website at **www.bcbsnd.com** or by calling the customer service number listed on your identification card. **Online pharmacy tools** are available through the Prime Therapeutics® website at **www.MyPrime.com**. BCBSND members can find drug cost estimates or check if a particular drug is on the BCBSND formulary.

Under some circumstances, formulary drugs may be excluded from coverage under the drug benefit (e.g., oral contraceptives, nicotine replacement therapy, Retin-A, various injectables, etc.). In all cases, plan inclusions/exclusions determine specific coverage regardless of formulary status. Drugs not listed are non-formulary.

### Specialty Products

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral or injectable medications that can either be self-administered or administered by a health care professional. These high cost medications also have one or more of the following characteristics:

- Unique storage or shipment requirements
- Additional education and support required from a health care professional
- Usually not stocked at retail pharmacies

## Providers

### Generic Utilization

The BCBSND Committee encourages generic utilization as a way to provide high-quality drugs at a reduced cost. By prescribing drugs listed in this formulary that are available generically, you are providing a product that can be expected to have the same effectiveness and safety profile as the brand product while lowering overall medical insurance costs for your patients. In addition, your patient will likely have a lower cost share for generic drugs because most benefit plans are based on a tiered or brand/generic copayment and coinsurance structure.

### Prior Approval

Use of some products may be approved only after certain criteria are met. If prior approval is not obtained, benefits may be denied. A physician (or clinic personnel) should submit a written request to the address shown below for prior approval consideration. The Prior Approval Request form is available at <https://www.bcbsnd.com/web/providers/forms>. A list of the products requiring prior approval may be found at <https://www.bcbsnd.com/web/providers/pharmacy> under **Restricted-Use Drugs**.

### Dispensing Limits

Products in certain drug categories may have dispensing limits to encourage appropriate prescribing quantities as recommended by the FDA approved product labeling, or as otherwise clinically appropriate. Requests for a quantity that exceeds the dispensing limit should be submitted for consideration on the Dispensing Limits Authorization form available at

<https://www.myprime.com/v/BCBSND/COMMERCIAL/en/forms.html>. A list of products with dispensing limits may also be found at at this site and at <https://www.bcbsnd.com/web/providers/pharmacy> under **Restricted-Use Drugs**.

## How to use this list

The Formulary is organized into broad categories (e.g. Anti-Infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g. Penicillins) or by use for a specific medical condition (e.g. Diabetes). These categories can help determine which specific product is on formulary. The graphic below shows the information that is provided in each column of the medication list and is an example only. Please use the drug search function to find current information for drugs on the medication list.

1 Drug Name	2 Specialty	3 Prior Approval	3 Dispensing Limits
<b>ANTI-INFECTIVE AGENTS</b>			
<b>PENICILLINS</b>			
AMOXICILLIN – amoxicillin (trihydrate) chew tab 125 mg			
AMOXICILLIN – amoxicillin (trihydrate) chew tab 250 mg			
<b>amoxicillin (trihydrate) cap 250 mg</b>			
<b>amoxicillin (trihydrate) cap 500 mg</b>			
<b>amoxicillin (trihydrate) for susp 125 mg/5ml</b>			
<b>amoxicillin (trihydrate) for susp 200 mg/5ml</b>			
<b>amoxicillin (trihydrate) for susp 250 mg/5ml</b>			
<b>amoxicillin (trihydrate) for susp 400 mg/5ml</b>			
<b>amoxicillin (trihydrate) tab 500 mg</b>			
<b>amoxicillin (trihydrate) tab 875 mg</b>			
<b>amoxicillin &amp; k clavulanate chew tab 200-28.5 mg</b>			

- The first column of the chart lists the drug name. Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). The reference brand is a non-formulary drug. Some generic products have no reference brand.

Brand prescription drugs are shown in capital letters followed by the generic name.
- The second column indicates if the drug is a specialty drug. **Note:** Additional information about specialty drugs can be found in this document under the header for Specialty Products.
- The columns indicates the Utilization Management (UM) program(s) that apply to the prescription drug (e.g., Prior Approval and Dispensing Limits). If an indicator is present in the column(s), then the UM program noted is possibly applied to your benefit. Some plans may have UM on additional medications beyond those noted in this document.
