

Preventive Services: Covered Contraceptive Products

We are committed to empowering you to know your coverage options for preventive care and make informed health care decisions. Under our Preventive Services benefit*, we cover FDA approved contraceptives. Some contraceptives are available from a pharmacy (under your “Prescription Medication Benefit”), while others are provided by your doctor (under your “Medical Benefit”). If you have preventive benefit coverage, these products are covered at no cost to you.

*Not all plans include preventive benefits covered at 100%. Check your benefit booklet for your specific coverage.
